

"603 Killer Article Locations" and much, much more...

-Written and Compiled by Matt Bacak

I really felt that you need to get your hands on my compiled list of articles especially after you listen to my "Article Marketing Cash" audio. But, just giving you a list wouldn't really help you until you listen to the dang thing. So, I decided to give you a lot more...

Thanks again for getting the "Article Marketing CASH' audio.

You ROCK!

How to Create Monthly Content...or Just Content, For That Matter

You have three choices here...

- ❶ **Become a reporter**
- ❷ **Become the expert (or the guru if you will)**
- ❸ **Become a publisher**

Personally, I have played in all these areas and have made millions in each area.

When I first started my online business back in 2001, I read a book called Think and Grow Rich. I looked at the book a little differently than most people. I noticed that the author, Napoleon Hill, was not rich when he wrote it but was reporting what he learned from millionaires.

So from that idea of being a reporter, I decided to create my first online newsletter and called it 'Millionaire Minutes' I put up a squeeze page and started driving traffic to it. I reported to my subscribers knowledge from my minutes spent with millionaires. Basically, I got paid to go to seminars and learn from people. Then I'd use my list to make friends and business associates.

How did I do that?

I leveraged my list by mailing for others. Selling their products and doing JV's. I became what we call today a super-affiliate. I also put on seminars as a promoter. I'd email my list to come to events that I put on and had others speak at. I never spoke back then they did. My initial idea was, "They can have the fame, but I'll take the fortune" and that's exactly how I made my first million. Basically, I did it with just a opt-in page and an email list.

Then people wanted to know how I made money online, how I put butts in seats, how I built my list and how I put on teleseminars. People literally were begging me to teach them how to do it. So, I argued with them. I said no I'm not interested. (Remember what I said earlier - "You take the fame I'll take the fortune.") At this stage in the game I learned a very good lesson from a mentor of mine. The lesson was "Smart Marketers don't argue, they give."

What he meant by that was when someone is throwing money at you why in the world would you say no. So, I put on an event and shared what I was doing for the first time. My second million was made.

Meanwhile. I now built two lists, "Millionaire Minutes" and "Internet Marketing". I realized that I liked sharing what I was doing and quickly realized that I neglected the list that I first built. I needed to find content fast. So, I decided to contact the people that I was a super affiliate for and asked them to partner up. I do all the marketing and they do all the content. Worked out great and I built two (2) Multi- million dollar companies that way.

Some Things to think about:

Become the reporter

You will need to interview people...

How to find people to interview:

On google (organic and adwords – look for direct response savvy. If they're building a list or use a squeeze page – you got a winner).

Alternative method below.

Go to RTIR.com because people PAY to get exposure because they WANT to be interviewed on radio or TV.

Become the Guru

- Write your own stuff
- Make your own camtasia videos (they also have higher perceived value)
- Record audios (MustHaveAudio.com)
- Record normal full motion videos with any cheap video camera from WalMart.
- Layer in MULTIPLE types of media for maximum profits.

Become the publisher

-Partner with a REAL expert and have them do all the content on a continual basis for a %. You handle all the marketing. (I'd suggest handling the money too)

-Or you can just BUY pre-existing content. You'd be surprised what people will take to buy an old website they don't do anything with – but has killer content. Think about it.

Here is some idea's to buying pre-existing content or PLR.

"PLR" stands for Private Label Rights, which grants you the right to use content written by someone else as if it were your own. This usually includes:

The right to modify or re-write the material any way you like.

*The right to insert your own name as the author.

*The right to sell or give away the material to others.

This creates a lucrative opportunity for internet business owners because they get access to quality written content at very low prices. That's why I have compiled a list of locations to get this material. I'm very excited about what I found, I hope you use this well. Make sure you read the PLR article in this issue for ideas.

Read to see what rights you are buying; generally PLR products allow you to keep 100% of the profits, the right to modify the product and usually you're allowed to put your name as the author/creator of the product.

With Master Resell Rights you are buying the PLR and in general buying the right to you to resell the material for others to be able to distribute it as well. Know the difference.

Also some people rewrite the title and introduction to PLR material that they purchase while many use it straight out of the "box." Save your material in a logical file name and structure so that you can find it again. A few people keep reference spreadsheet listing the title, site you bought it on, rights, word count, where you have used it, and so forth.

You might even combine it with your own material as a chapter or part of a product bundle. The possibilities are endless. This is a way to have "ghost" writer at a fraction of the cost.
